

## KartLift High-Performance Kart Stands

Above: Titan KartLift Part No. 9983-201

Below: Pro KartLift Part No. 9983-200

Truly a one person solution to lifting your kart in the shop or at the track. Enjoy the benefits of being able to "go it alone" by using KartLift stands. Great for loading karts in and out of pickup truck beds or trailers without ramp doors. The **Titan KartLift** uses gas struts to take the weight of your kart off your hands, making lifting the kart much easier. A manual safety release requires that you support part of the weight of the kart with one hand while lowering it, so this unit is recommended for karts weighing less than 200 pounds and operators who weigh at least as much as their karts. Your body weight pushes down on the gas struts to collapse the lift, so this lift requires an operator weighing at least 120 pounds. The **Pro KartLift** is designed for karts weighing up to 60 lbs more than the operator. A foot lever releases the safety catch while lowering the stand, allowing a lighter operator to use both hands while lowering a heavier kart. The **Electric KartLift** raises and lowers your kart effortlessly with the simple push of a button! It is recommended for heavier karts (up to 400 lbs!), particularly where the kart outweighs the operator by 60 lbs or more. The Titan features a durable black powder coated finish. The Pro and Electric lifts both feature an attractive silver powder coat finish and a lower tool tray for starter, helmet, etc. The Electric KartLift includes the battery and charger.

**Titan KartLift**.....Part No. 9983-201 ..... \$410.00  
200 pound maximum kart capacity. Operator should weigh at least as much as the kart.

**Pro KartLift**.....Part No. 9983-200 ..... \$575.00  
Ideally suited to Sprint, Oval, Cadet, Shifter, TaG or any type of racing kart except Champ karts. Kart should not outweigh operator by more than approximately 60 pounds.

**Electric KartLift**.....Part No. 9983-202 ..... \$1,300.00  
Ideally suited for laydown Enduro karts, Champ karts, concession karts, karts outweighing the operator by more than 60 pounds, operators under 120 pounds, or anyone who needs to lift and lower a kart without exertion. The Electric KartLift has a longer chassis than the Pro KartLift, providing increased kart stability while in the raised position.

Save your back with a KartLift!

Electric KartLift Part No. 9983-202 shown with Sprint kart fully raised. Includes battery and charger (does not include kart). Lift karts weighing up to 400 pounds with the push of a button!

KARTING

## Kart Tire Changing Tools

Kart tire changing made easy!

Our **Manual Kart Tire Bead Breaker** is designed to exert force straight down to push the tire from the rim with a minimum of effort. The tool face is angled to slide under the rim and work directly on the bead without damage to the tire or wheel. Cleats on the base help to steady the wheel rim. Adjustable height allows use with any width kart tires on 5" diameter wheels.

**Kart Tire Manual Bead Breaker for 5" Rim Diameter**  
Part No. 9984 ..... \$31.99

Tire Wizz Tool Part No. 9986-003

Tire Wizz On-Handle Part No. 9986-010
