

Bridgestone Tires for Race Karts

Bridgestone Dry Tires for race karts

Bridgestone Wet Tires for race karts

OMP Karting Tire Bag
Part No. 9342-Black
(also available in red)

Bridgestone's outstanding record of quality and accomplishment in racing is legendary and we're proud to offer Bridgestone tires for race karts. We stock some of the most common 5" diameter tires. Other sizes and compounds are available in both 5" and 6" diameters. Please contact us if you don't see your required tire listed here.

YHC or YJL Compound A medium grip tire, specified for use in many local, regional and national karting series.

YJB Compound Provides a much higher level of grip, and is specified for use in several premier national level classes in both 2-cycle and 4-cycle racing (see website for YJB tires).

YKP Compound Rain Tire The ultimate karting rain tire – works equally well in both full wet and damp conditions.

OMP Karting Tire Bag Stores 4 kart tires. Avail. in black or red.

Sprockets and Accessories

Premier Lightweight Sprocket Hubs

Part No. 9810-1.00

Part No. 9810-1.375

Machined from billet aluminum, **Premier Sprocket Hubs** are lightweight and durable. Their low rotational inertia allows faster acceleration and quicker clutch engagement. Available for 1.00", 1.25", 1.375", and 40mm axles.

- Sprocket Hub, 1.00" Axle Part No. 9810-1.00..... \$43.99
- Sprocket Hub, 1.25" Axle Part No. 9810-1.25..... \$39.99
- Sprocket Hub, 1.375" Axle Part No. 9810-1.375..... \$51.99
- Sprocket Hub, 40mm Axle Part No. 9810-40mm..... \$44.99
- 1/4" Sq. x 8" Axle Keystock..... Part No. 9823..... 99¢

Premier Split Ring Sprockets

Premier Split Ring Sprockets are manufactured from .160" thick aluminum, black anodized and hard coated for durability. Split ring sprockets allows you to quickly and easily change gearing without removing the wheel. Two-piece design takes up less storage space, too. Sprockets are available to fit either #219 or #35 chain.

- #219 Split Ring Sprockets, specify number of teeth, 65 to 97
Part No. 9804-Size Price varies by size: \$19.49 to \$24.99
- #35 Split Ring Sprockets, specify number of teeth, 53 to 85
Part No. 9803-Size Price varies by size: \$19.79 to \$24.99

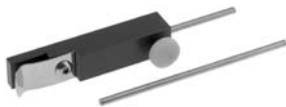

Extron Pro Kevlar® Rear Sprockets

Extron Pro 219 Sprockets are 40% lighter than anything on the market today. Kevlar® construction makes these sprockets stronger, quieter, and more durable than any aluminum or composite sprockets. Reduced sliding resistance compared to other sprocket materials also keeps the sprocket cooler, increasing chain life. Fits karts using 219 chain and 6-bolt carriers. Available in 72 through 92 tooth counts.

Extron Pro Kevlar® 219 Sprocket, specify tooth count ... Part No. 9806-Size..... \$21.49

Sprocket Tools

Sprocket Alignment Tool This handy tool snaps on to your sprocket for easy alignment. Simply adjust the axle sprocket until the extended rod on the tool just touches the engine sprocket. Much more compact than a ruler, and the hard anodized billet aluminum design assures years of carefree use.

Sprocket Alignment Tool Part No. 9989-001..... \$32.99

Chains and Accessories

Left: EK #219 Silver Pro Chain
Part No. 9817-Silver-114

#219 Blue O-ring Chain
Part No. 9814-219

#35 Standard Master Link
Part No. 9815-Std

EK Racing Chains and Master Links

EK Racing Chains combine high strength, low wear and high-impact anti-kinking performance at a great price. Available in Standard and high strength Silver Pro designs.

- #219 Standard, 114 links Pt. No. 9817-Std-114 \$34.99
- #219 Silver Pro, 114 links Pt. No. 9817-Silver-114 \$44.99
- #35 Standard, 106 links Pt. No. 9816-Std-106 \$19.99
- #35 Silver Pro, 106 links Pt. No. 9816-Silver-106..... \$22.49
- #35 Standard Master Link Pt. No. 9815-Std \$1.99
- #35 Silver Pro Master Link Pt. No. 9815-Silver \$1.99

RK 219 Blue O-ring Chain

RK Blue O-ring Chains are used by most of the top kart racing teams. The highest quality hardened alloy steel and O-ring seals allow it to transfer more power, run cooler and stretch less than other racing chains. Stocked in #219 size, 114 link only.

RK #219 Blue O-ring Chain..... Pt. No. 9814-219 \$54.99

DID 428 Roller Chain

DID 428 Roller Chains provide excellent strength, long life, and free running for those karts set up to use a 428 size chain. Stocked in 60 link length.

DID 428 Roller Chain Pt. No. 9814-428-60 \$49.99

Chain Pin Tools

Chain Pin Tools These high quality tools make it quick and easy to remove and install pins on 219, 35, or 428 chains by hand. Each tool is made from precision machined steel and includes one setscrew and one pin drive screw. Replacement pin drive screws are also available.

- #219 Chain Tool Part No. 9992 \$22.99
- #35 Chain Tool Part No. 9991 \$21.99
- #428 Chain Tool Part No. 9994 \$39.99
- Spare #219 Pin Drive Screw Part No. 9993-219 \$7.99
- Spare #35 Pin Drive Screw Part No. 9993-35 \$7.99
- Spare #428 Pin Drive Screw Part No. 9993-428 \$8.99

Maxima Synthetic Chain Lubricant

Maxima Chain Guard is an advanced spray-on synthetic lubricant for all types of chains used on karts, motorcycles, and chain-drive race cars. This unique O-ring safe lubricant penetrates quickly and then sets up to protect against corrosion, friction, and wear on your chain and sprockets. The clear synthetic formula is environmentally-friendly and will not harm rubber or plastics. Completely waterproof and stable up to 600°F. It makes a great cable and lever lubricant, too. 14 ounce ozone-friendly aerosol can.

Maxima Chain Lubricant, 14 oz. Part No. 9904-Can \$11.79

Burriss High-Rev Two-Cycle Lubricants

Burriss Hi-Rev two-cycle lubricants are recommended by many karting engine builders. They are available in a synthetic Blend or conventional Castor. Both Burriss oils feature the purest degummed castor oil blended with advanced additives to eliminate ring sticking, reduce carbon and varnish formation, protect against rust and corrosion and eliminate sparkplug fouling.

Burriss Hi-Rev Blend oil uses clean burning petroleum based oils and a special castor fraction that blends with the petroleum oil to impart outstanding anti-suff properties and high temperature lubrication. Burriss Hi-Rev provides your two-cycle racing engine with the most protection available from any petroleum or synthetic oil on the market while holding combustion chamber deposits and ring sticking to an absolute minimum. Burriss Hi-Rev Blend also makes a great top end lube for four-cycle gasoline engines.

Burriss Hi-Rev Blend, 16 oz. bottle Part No. 9901-Blend..... \$7.49

Burriss Hi-Rev Castor oil is an excellent lubricant for gasoline, alcohol and nitro fuels. Castor oil is a natural extreme pressure lubricant, which results in extended engine life. Burriss Hi-Rev Castor is also a great top end lube for four-cycle gasoline engines.

Burriss Hi-Rev Castor, 16 oz. bottle Part No. 9901-Castor \$8.99
