Fuel Safe Accessories

Standard Fuel Cell Pickup Use to add a second pickup to a cell. These can be installed by drilling an extra hole in the fill plate and installing the included bulkhead union.

3/8 inch Fuel Pickup (6AN) with filter screenPart No. 2520-3/8 \$46.49
1/2 inch Fuel Pickup (8AN) with filter screenPart No. 2520-1/2 \$54.49

Corner Pickup Fitting Replaces the filter end of the standard pickup and allows more fuel to be used. However, it does not incorporate a filter screen.

3/8 inch Corner Pickup Fitting Only (no hose)Part No. 2521-3/8 \$38.99
1/2 inch Corner Pickup Fitting Only (no hose)Part No. 2521-1/2 \$38.99

Surge Tanks For the ultimate in fuel scavenging, these surge tanks are the way to go. They mount inside the fuel cell and trap fuel with the aid of 3 integral check valves.

Surge Tank with 6AN FittingPart No. 2538-6AN.... \$162.99
Surge Tank with 8AN FittingPart No. 2538-8AN.... \$162.99
Surge Tank with Integral Low Pressure Fuel PumpPart No. FS ST100LP...\$434.99
Includes bulkhead mounted electrical connector.

2 Gallon Fuel Foam Block, 8 x 8 x 8 Inches Use to replace deteriorated fuel cell foam. Can be trimmed and used as replacement foam for custom or formula car cells. See prior page for replacement foam baffling kits for standard rectangular fuel cells.

2 Gallon Fuel Foam Block, 8 x 8 x 8 inchesPart No. 2541 \$54.99

In-line Fuel Vent Check Valve The outside diameter of this valve is approximately 7/16 inch and the O.D. is barbed to maintain a tight fit when pushed into the end of size 8 Aeroquip hose or into 3/8 inch I.D. rubber fuel hose.

In-line Check Valve for fuel ventPart No. 3216 \$15.49

Miscellaneous Fuel Cell Accessories

8AN Vent Fitting with Check Valve (mounts on fill plate) ..Part No. 2522 \$38.99

Fuel Level Senders and Gauges

Electronic Fuel Level Senders These electronic senders have no moving parts, so they are very rugged and dependable and can be shortened for an exact fit. A secondary low level warning circuit can trigger a separate "empty" warning light (not included). The gauge signal and the low level trigger point are easy to calibrate to any desired level. Both senders will work with any GM compatible (65 and up GM, 0 - 90 ohm range) gauge.

3 to 12" Sender with Tap for Low Level Warning LightPart No. 2524-12 inch .. \$179.99
12 to 24" Sender with Tap for Low Level Warning LightPart No. 2524-24 inch .. \$209.99
Fuel Level Gauge, mounts in 2 1/16 inch diameter cut-outPart No. 2524-Gauge .. \$77.99

Economy Dipstick Fuel Level Gauge This dipstick is built into an 8AN fitting for mounting in the most crowded fill plate. Universal 20 inch stick can be cut to any length.
Economy Dipstick Fuel Gauge, 20 inchPart No. 2536-20 \$37.49

Flo-Fast Fluid Transfer Pumps and Accessories

Save your back! **Flo-Fast Fluid Pumps** allow you to quickly and easily transfer fluids without spilling. Simply screw the integral cap onto your utility jug and turn the crank. The clear 7 foot long filler hose has a long enough reach so that you won't have to lift the jug. A clamp-on tether is included to help to keep the hose in place while pumping. Pumps 5 gallons in 1 minute without spilling or straining — you can't pour that fast through a funnel! Turn the crank backwards to draw fuel back into the jug after the race. Your fuel cell bladder and foam baffling will last much longer if they are not continuously exposed to fuel. The potential savings in fuel cell replacement costs can pay for your Flo-Fast pump many times over! The pump is compatible with fuels, lubricants*, water, coolant, and most commercial cleaning fluids. * Viscous lubricants and fluids will pump more slowly than fuel. **Note: Jugs sold separately.**

Filler Hose 5 foot Extension Kit for Flo-Fast PumpsPart No. 2577-050 \$13.99
Combine with standard 7 foot filler hose for 12 foot total length.

Heavy-Duty Utility Jugs & Accessories

There are many five gallon jugs on the market and though they may look similar, quality varies widely. Our utility jugs are made to DOT Specification CFR 49, Part 178.19-6. This is a very tough specification that cannot be met by lightweight jugs. These jugs also exceed worldwide UN performance standards. The caps are heavy-duty, thick wall construction with a 3/4 inch pipe plug for hose attachment and a flat machined gasket sealing surface. Each jug measures 9.38 inches square x 21 inches high. These jugs are not to be used as a portable fuel container in states that require spill proof systems or have spill proof system regulations. Available in white, and neon green.

5 gallon Square Red JugPart No. 2558-Red... N.L.A.
5 gallon Square White JugPart No. 2558-White \$24.99
5 gallon Square Neon Green JugPart No. 2559-Green \$26.99
18" Filler Hose with 3/4 inch pipe thread (attaches to cap)Part No. 2565 \$5.99

Replacement Parts

Replacement Cap Assembly (includes gasket and pipe plug) . Part No. 2561 \$9.99
This durable, heavy-duty cap will also work on most other brand jugs that use a 3.5" dia. thread.
Replacement Cap Gasket OnlyPart No. 2562 \$2.99
Replacement Vent Cap OnlyPart No. 2563 \$1.29
Replacement 3/4 inch Pipe Plug for capPart No. 2564 \$1.99

None of the utility jugs shown on this page are to be used as portable fuel containers in states that require spill-proof venting systems. Compliance with local regulations is the responsibility of the person using the jug.
