

K&N Filtercharger Air Filters

K&N Filterchargers are constructed with a unique multi-layered washable cotton grid fabric that retains K&N air filter oil in suspension to trap dirt and dust without clogging air flow passages. The pleated fabric and bonded wire mesh straightens air flow and reduces turbulence – in some cases actually increasing air flow and horsepower.

Cone Style Racing Filters

These filters were originally designed for use in air scoops of specific formula and sports racing cars, but they can be adapted to a wide variety of uses. The large end is round but flexible enough that it can easily be formed into an oval shape to fit the inlet of most any scoop design. The small end has a hole to allow debris to pass through the scoop.

5.87" inlet dia. x 2" small end dia. x 10" long (Lola S2000).....	Part No. 3801	\$40.99
5.87" x 2" x 8" (short version of above)	Part No. 3802	\$40.99
5.50" x 2" x 16" (Tiga S2000)	Part No. 3803	\$40.99
6.12" x 3" x 16" (83-85 Tiga S2000)	Part No. 3804	\$48.99
4.87" x 2" x 16" (Ralt Atlantic & Super Vee)	Part No. 3805	\$40.99
5.75" x 2" x 16" (Swift S2000)	Part No. 3806	\$40.99
Extension for above, 8" x 4.87" small end dia. x 11.6" long	Part No. 3807	\$48.99

When Part No. 3806 is combined with Part No. 3807 they form a 27" long unit with a huge air flow area!

Air Filter Assemblies for Various Carburetors

We stock these K&N custom filter assemblies for many common road race applications. All of these assemblies include a chrome plated top plate except for the universal round tapered type. All have replaceable elements except for the VW Solex and universal round tapered styles. **Note:** Part No. 3815 is made by ITG since K&N no longer supports the application.

Ramair Filter for Ford 1.6L and 2.0L

The compact **Ramair** filter (7" long x 5.5" wide x 3.5" high) is small enough to fit most cars even if the bodywork or air scoop is very close fitting. The two-stage foam element draws air through the top as well as the sides and incorporates an integrally bonded wire support cage to allow the greatest possible air flow for its size. The aluminum base plate bolts to a Weber 32/36DGV carburetor. The filter element is fastened to the base plate with quarter-turn fasteners for easy removal.
