*Bell introduced the SRV friction-lock system as a rolling production change in 2005-06. See photos below to determine which style shield you need.

The original **Kam-Lok** detent system shown here was used on all Bell helmets up to 2005. The Kam-Lok pivot is identified by the large round pivot washer and the notched slot in the shield.

The new **SRV** shield pivot system shown here was introduced in 2005-06 on certain helmets. The SRV pivot is identified by the oblong pivot washer and the smooth slot in the shield.

 - Peak Visor** Part No. **OMP-SC036** \$89.00
- As supplied with Speed helmet. Can also be installed on Grand Prix to convert to an open-face helmet.

Tear-Off Shields

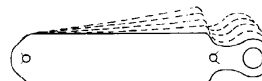

Speedstack7™ Laminated Tear-Off System

The **Speedstack7™ Laminated Tear-Off System** is simplicity itself! It mounts seven layers at a time and is clearer than anything else you have ever tried! Seven layers laminated together equal the visibility of one conventional tear-off -- stackable up to 28 layers. No dust, fog, or water between layers; installs as one piece. Includes 4 sets of 7 laminations for a total of 28 tear-offs. Available for **Simpson**, **Bell** and **Pyrotec** helmet shields; choose your application and post spacing, and specify Clear, Smoke, or Amber tint.

- Speedstack7™ Tear-Offs for Bell & Pyrotec (12 3/8")** Part No. 2307-001-Color . . . \$26.99
- Speedstack7™ for Simpson Voyager (11.5")** Part No. 2307-002-Color . . . \$26.99
- Speedstack7™ for Bandit, RX (11.5" w/ notched nose)** Part No. 2307-004-Color . . . \$26.99
- Speedstack7™ for Simpson Shark, VUDO (12.75")** Part No. 2307-006-Color . . . \$26.99

Tear-Offs for Bell and Pyrotec Helmets

These quality tear-offs are 5 mils thick (0.005") and fit shields with 12 3/8" post spacing, including **Bell** and **Pyrotec** helmet shields. Sold in a 5 pack.

- Bell Tear-Offs, 5 pack** Part No. 2251 \$3.49

Adjustable Tear-Off Posts

These adjustable posts can be used to fit tear-off strips to face shields not originally designed for them. Package of two posts and two screws is enough for one shield.

- Adjustable Tear-Off Posts, pair** Part No. 2253 \$4.29

Shield Storage and Protection

Self-Adhesive Shield Protector for Bell and Pyrotec Helmets

Here's a great way to extend the life of your helmet face shields. Simply apply this clear protective laminate to the outside of a clean shield. The "Perimeter Seal" adhesive seals out dust to protect against the light scratches that form when your tear-offs rub against the shield. When the surface gets scratched, just peel off the top layer. Each laminate has three layers. Since the adhesive is only around the edge, it's easy to remove when the last layer is used up. Protects one shield. Sized to fit most Bell and Pyrotec shields, but will fit many other brands as well. Put one on each of your shields today!

- Self-Adhesive Shield Protector** Part No. 2311 \$26.99

Helmet Shield Storage Sleeve

Here is a low-cost solution to expensive helmet shields getting scratched while being stored in your gear bag. Our soft felt sleeve has a drawstring closure at one end to provide a secure way to protect your spare helmet shields. Universal design fits most shields.

- Helmet Shield Storage Sleeve** Part No. 2136 \$5.99
